

# iCore360<sup>®</sup> Vendor Management

## Ease your vendor compliance burden with iCore360.

For many banks, managing vendors efficiently and remaining compliant can be a challenge, if not a downright hassle. The good news is, DCI can make it all much easier with our iCore360 vendor management option.

### Simple, Convenient, Complete

Built directly into iCore360, the vendor management option lets you easily manage multiple vendor relationships that are fully compliant, yet customized to your bank's policies and procedures.

No more clunky spreadsheets, multiple apps and files to handle. Just click the iCore360 menu and in no time at all, you can have all your vendor information fully documented, stored and ready to manage in one central location, at your fingertips, with automated features and reporting to ensure your compliance.

Plus, flexible settings let you focus on what you need and want to track for your bank, with automatic reminders to make sure you remember when it's time to review.

The iCore360 vendor management option makes it easy to:

- Rate vendors by risk
- Attach and review due diligence items
- Set custom, automatic reminders for each vendor review
- Track required and custom information for each vendor
- Maintain multiple financial and audit reviews for each vendor
- Attach and update contracts and other documents online
- Customize parameters to your bank's needs and policies

### Easy or Easier? You Choose.

Best of all, you can choose to either do it yourself or let our vendor management experts manage the entire process, including due diligence, recommendations, and updates. You still own the vendor relationships, financial decisions, and have full access anytime – we just do the work for you.

Contact your CRM today and remove a little more hassle from your life with iCore360 vendor management.
